

GENESIS IT SOLUTIONS LLC

AI Enablement, deployed safely.

SECURITY • COMPLIANCE • CONFIDENCE

CAPABILITY STATEMENT

SDVOSB • VOSB CERTIFIED

CORE COMPETENCIES

Cybersecurity compliance and AI governance advisory: assessment, remediation planning, and program build-out.

► Security Foundation

CMMC readiness, NIST CSF assessments, SP 800-171 gap analysis, and CIS Benchmark reviews for Microsoft 365, Azure, and AWS.

► AI Governance

ISO/IEC 42001 readiness, NIST AI RMF implementation, AI acceptable use and agentic AI standards, and shadow AI discovery.

► AI Enablement

Microsoft 365 Copilot tenant readiness, data governance and oversharing remediation, deployment planning, and end-user enablement.

► Fractional Leadership

Virtual CISO (vCISO) and virtual Chief AI Officer (vCAIO) engagements for organizations without full-time security or AI leadership.

FRAMEWORKS APPLIED

CMMC 2.0	NIST CSF 2.0	NIST SP 800-171	NIST AI RMF
ISO/IEC 42001	CIS BENCHMARKS	FAR 52.204-21 / 52.240-93	

DELIVERABLES

Assessment reports, control-mapped risk registers, policy documentation, and remediation roadmaps aligned to recognized frameworks — the evidence package an assessor, prime contractor, or insurer can act on.

DIFFERENTIATORS

- **Principal-led delivery.** Assessments are performed by the credentialed principal, not delegated to junior staff.
- **Published frameworks, not proprietary scoring.** Findings map to CMMC, NIST, CIS, and ISO control catalogs a client can verify independently.
- **Security and AI governance from one provider.** A single engagement covers the cybersecurity baseline and the AI management system rather than splitting them across vendors.
- **Microsoft ecosystem depth.** Microsoft 365, Entra, Intune, Azure, and Copilot are assessed and remediated at the configuration level.

PRINCIPAL EXPERIENCE

Engagements draw on 20+ years of IT and cybersecurity leadership:

- **Cybersecurity advisory.** Senior manager at a national consulting firm — NIST CSF, CIS, and ISO-based risk assessments and incident-response tabletops for oil and gas, manufacturing, government, and higher education clients. Led the firm's ISO/IEC 42001 AI governance service line.
- **Enterprise IT leadership.** Eleven years at a multi-state professional services firm, rising from administrator to Director of IT — NIST-aligned Zero Trust architecture, cloud migration, and vulnerability management and penetration testing programs.
